Ready meal handling

Maximum speed, product safety and hygiene

Jorgensen has delivered customised solutions for the food industry since 1933. With hundreds of references we are familiar with the demanding challenges in this highly competitive business. Ready to meet them with our unrivalled experience and expertise.

Together with leading food producers we are delivering innovative solutions to match the industry's crucial needs for automation, efficiency, flexibility, quality, food safety and traceability.

Excellent solutions and strong partnership

"I had the pleasure of working with Jorgensen Engineering on a huge project in Korea for a very ambitious and leading food supplier. The project included 3 Jorgensen packaging handling lines for ready meals. The scope of supply was fully automated lines with 14 robots, various unloading/loading conveyors, buffer system, line control and tracking system.

I must say that I appreciate Jorgensen's continuous support, excellent solutions and outstanding service. This is more than just a buyer-supplier relationship. It really shows the advantage of a strong and value-added partnership!"

Simone Ondelli, JBT FoodTech

Flexibility

- From semiautomatic to fully automatic solutions.
- Handling of all kinds of packages.
- Fast product changeover.
- Portfolio suits all capacities.
