

# LineCare

# Expertise Access

## Line Support 24/7

Who fixes your line  
at night?

Remote assistance,  
ensuring fast support  
and continuous  
monitoring.

### Competent Support

- Direct access to dedicated engineers
- Trained by line designer
- Experienced automation specialists

### Continuous Reporting

- Individual case reports
- Fast, incident follow-up
- Knowledge sharing

### Always Up-to-Date

- Proactive recommendations
- Resources – quickly from Jorgensen

# Data-Driven Decisions

## Line Fact

Are you data-driven or just guessing?

Live data and video insights to speed troubleshooting.

### Data-Driven Insights

- Access to live and historical production data
- Digital video-data diagnostics
- OEE and performance dashboards

### Seamless Integration

- Predefined hardware & software package with PLC/robot connected
- Supports standard interfaces such as OPC UA

### Expert Support

- Jorgensen expert on-site for full installation and setup
- Follow-up with Jorgensen support team

# Maximise Uptime

## Line Optimisation

Ready for peak  
performance?

Adjust equipment, improve  
system reliability, and  
increase production  
efficiency.

### Mechanical Optimisation

- Fine-tune and align units and transitions
- Wear inspection and adjustments
- Final report with actions

### System Maintenance

- Strengthen control reliability
- Cut risk of failures
- Reporting system health and improvements

### Optimisation Visit

- Live troubleshooting
- Increase throughput and efficiency

# Extended Lifetime

## Line Maintenance

Why replace when you can maintain?

Tailored maintenance for all equipment, ensuring optimised efficiency.

### Customised Maintenance

- Preventive and corrective care
- Data-driven analysis
- Based on production time

### Service Level Agreement

- Fully customised
- Ongoing line reviews
- Detailed service reports

### Optimised Maintenance

- Visual inspections
- Based on years of experience and data

# Future-Proof Operations

## Line Rebuild

### Why stay outdated?

Mechanical and functional upgrades with redesign and relocation of equipment.

## Line Transformation

- Partial or full mechanical and functional rebuilds
- Upgrade key automation units
- Extend line lifetime

## Conversion & Relocation

- Modify lines for new products or speeds
- Disassemble and relocate sections
- Reinstall and commission

## Certification & Support

- Full re-certification and documentation
- OEM integration expertise

# Solid Parts Strong Line

## Line Replacements

**Better safe than sorry?**

Original spare parts for all equipment securing uptime, efficiency, and reliable long-term supply.

### Our Service

- Global, reliable service
- Skilled in-house experts
- 12-months warranty
- Updated price list annually
- Customised item no. structure
- 3D part identification
- Maintenance planning tool

### We Guarantee

- Right parts, right place, right time
- Reduced total cost of ownership
- Increased availability
- Optimised efficiency
- Trusted long-term support
- OEM parts guaranteed

# Smart Skills Smooth Line

## Line Training

Want to boost skills  
and results?

Tailored training to  
ensure your team  
excels in operation  
and maintenance.

### On-Site Training

- Hands-on operation, maintenance, and control
- Combined classroom and on-site training
- Practical knowledge sharing

### Training Courses

- Mechanical, electrical and automation
- Combined workshop and classroom training
- Led by in-house experts

### Project Hand-Over

- On-site training included in your project
- Commissioning support with full training
