

DEPALLETIZING **PALLETIZING** SOLUTIONS

JORGENSEN DEPALL./PALLETIZING

Comprehensive and customized program to meet all handling needs

Jorgensen delivers a comprehensive program of depalletizing and palletizing systems. All systems are custom-built and handle the whole range of containers and pallets.

Depalletizing systems range from manually operated magnetic lifting frames to fully automated depalletizing consisting of several separate units. The systems suit all sizes and heights of pallets. Jorgensen's program also includes automatic removal and stacking of the empty pallets and divider plates.

Jorgensen designs and supplies various equipment for the palletizing of cans, glass jars, cartons etc. The custom-built systems will typically include magazines for empty pallets and divider plates as well as an arrangement for accumulation of filled pallets. Stretch wrapping can also be included in a combined system.

PROGRAM

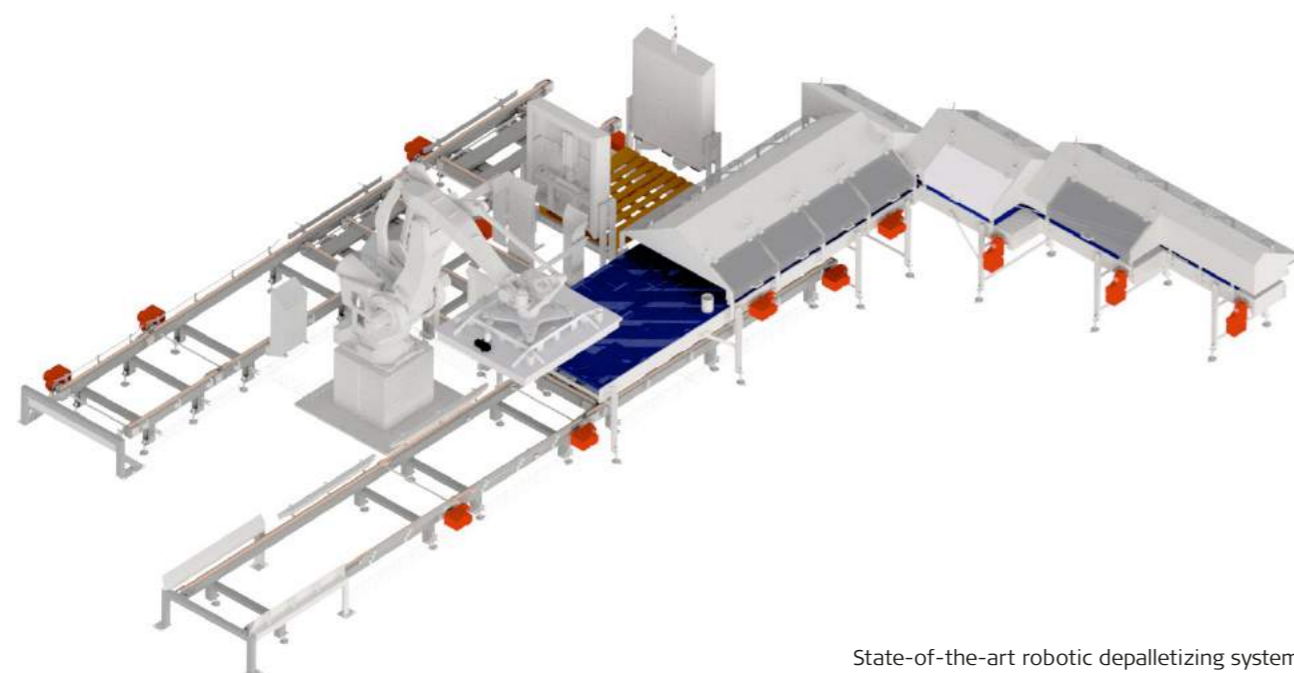

- Customized automation degree (semi to fully automatic)
- Handling of packages made of tin, alu, glass and plastic
- Can be constructed for all pallet sizes and pallet heights
- Capacity depending on degree of automation and package size (up to 1000 pcs.)

OPTIONS

- On hold for filled pallets
- Automatic removal of divider plates and stacking magazine
- Different single filing systems
- Conveying and stacking of empty pallets

Depalletizing/palletizing of all kinds of packages

State-of-the-art robotic depalletizing system

PRODUCTS

Products to be handled:

- Pouches
- Bottles
- Plastic bottles
- Plastic cups
- Alu trays
- Cartons
- Tin cans
- Alu cans
- Buckets
- Glass jars

PROCESSES

- A** Robotic depalletizing of scoop caps
- B** Robotic depalletizing of glass jars
- C** Robotic depalletizing of cans
- D** Robotic palletizing of cases
- E** Robotic palletizing of cases
- F** Depalletizing of cans
- G** Depalletizing of glass jars and tops
- H** Compact depalletizing system
