

JORGENSEN
LINE
FACT

Data-driven decisions

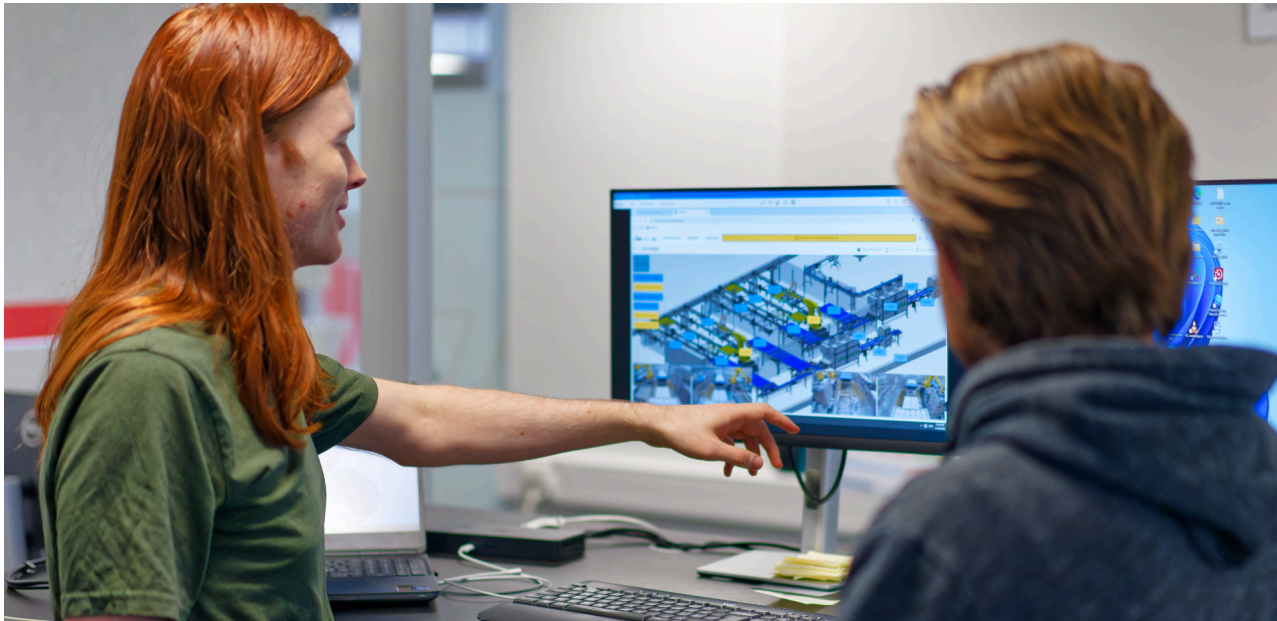

Full control. Clear decisions. Real growth.

Jorgensen has decades of experience in automation and process optimization. To enhance efficiency, quality, and uptime across modern manufacturing, we have developed LineFact.

A scalable platform that unites data and video in one powerful system and sets new standards for insight, performance, and reliability.

By merging real-time data with visual context, LineFact enables faster troubleshooting, reduced downtime, and smarter decision-making.

Its intuitive dashboards and flexible integration with PLCs, robots and third-party systems make it the ideal foundation for efficient, transparent, and future-ready production.

Why LineFact

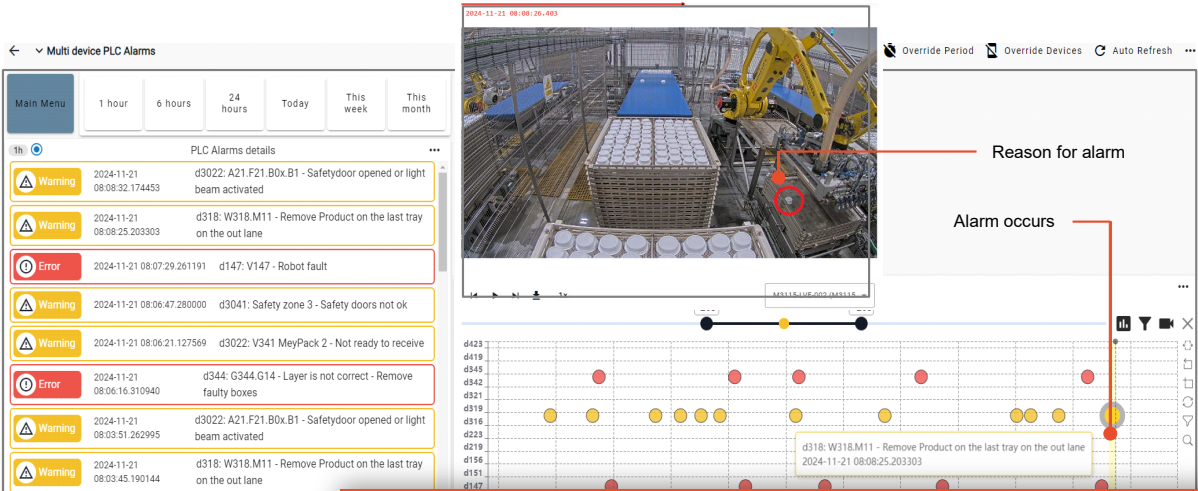

- Scalable platform
- Combines video and production data
- Boosts uptime and efficiency
- Compatible with Jorgensen and third-party equipment

Pain Points

- Manual and time-consuming troubleshooting
- Costly onsite support
- Limited root-cause insights
- Complex and competing systems

Our Solution

- Video combined with PLC/robot data
- Advanced analytics and flexible dashboards
- Remote support capabilities
- Automated error reporting

Benefits

-  Customer-based Knowledge
-  Central Overview
-  Historic Data Access
-  Rapid Video Fix
-  Custom-fitted to Perform

Customer testimonial

"LineFact is straightforward and intuitive to use, and has quickly become a valuable troubleshooting tool on our production line.

Reviewing video recordings makes it easy to pinpoint exactly where errors occur, which has already saved us time and improved daily operations.

The interface is logical and user-friendly, and while only a few key users are currently active, we are already planning to expand the setup with additional cameras and larger screens to fully utilize its potential."

Rhys Pomeroy, Engineer at Dearboy Petcare
