

# PET FOOD HANDLING SOLUTIONS

# Pet food handling

## From semiautomatic to state-of-the-art

Pet food producers are continually forced to optimise products, packages and processes, and Jorgensen has served the industry for many years. With hundreds of customised handling solutions delivered, we are familiar with the demanding challenges in this competitive business.

Ready to meet them with our unrivalled experience and expertise. Together with leading pet food producers we are delivering innovative solutions for cans, alu/plastic trays and pouches to match the industry's needs for automation, efficiency, flexibility, quality and traceability.

### Project management excellence

"As we like to say, Project is King, and our ultimate goal is to be able to deliver large projects on time and within budget. Being flexible and remaining in close contact with the customer and contractors is of the highest priority to us.

We always strive to adapt to how the project progresses as well as to form a relationship with our customers to better understand their needs and focus areas.

In the end, the aim for Jorgensen and the customer should be equal: a successful project, completed as efficiently as possible while skillfully handling the concerns and issues that will inevitably occur."

Morten B. Larsen, Project Manager at Jorgensen Engineering

### Flexibility
