JORGENSEN ROBOTIC HANDLING

Robot integration and systems for all kinds of packages

APPLICATIONS

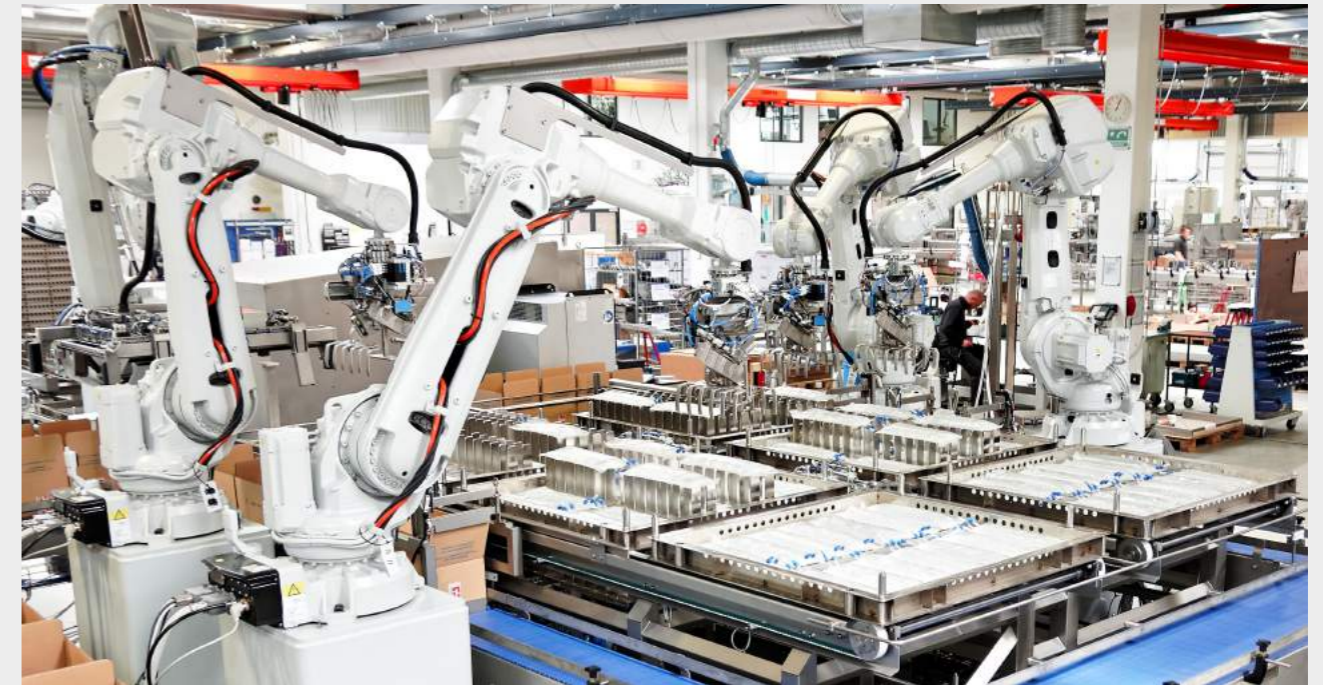

Robotic solutions are the answer in a constantly changing market demanding speed, automation and flexibility. Jorgensen provides in-house developed and manufactured robotic solutions for all kinds of packages to all kinds of applications:

- Depalletizing
- Palletizing
- Loading/unloading
- Pick & place
- Material handling

BENEFITS

Based on the customers' indispensable requirements and task challenges Jorgensen has developed several state-of-the-art handling solutions with clear benefits:

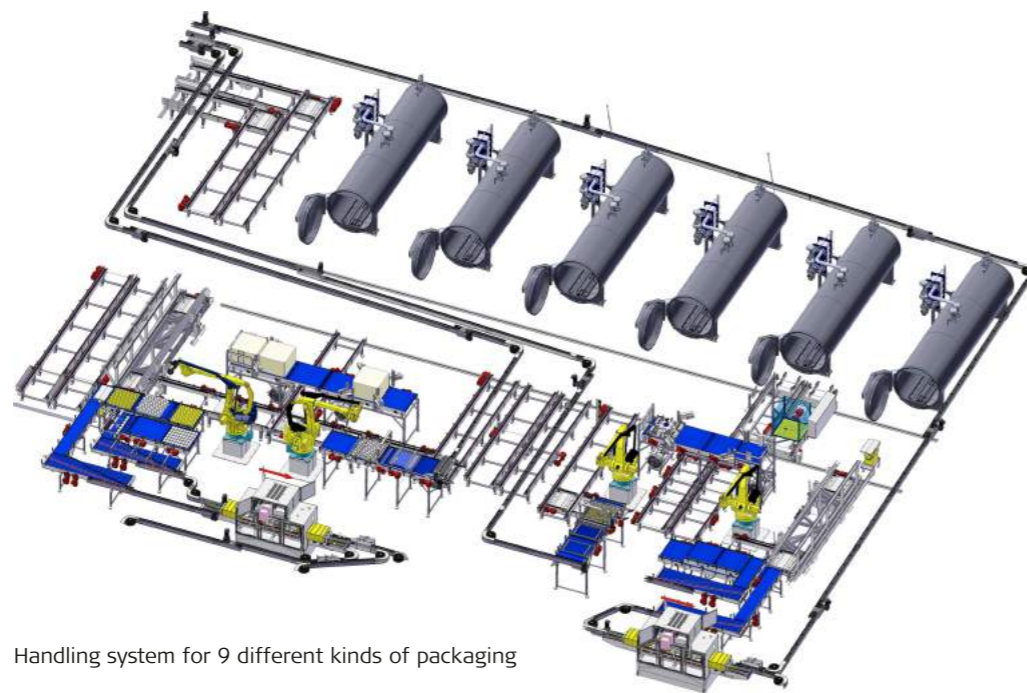

- **Highest flexibility:** complete solutions for all product types with a single grip tool for all product variations
- **Fully automatic set-up:** high capacity, flexibility, quality, homogeneity and removal of Repetitive Strain Work
- **Quick changeover:** product change is carried out smoothly
- **Ultra compact design:** the solutions are designed for a very limited space
- **Full product traceability:** reliable batch information, inspection and test data

Handling system for 9 different kinds of packaging

ROBOTIC PROCESSES

- A** Handling of pouches (pet food)
- B** Depalletizing of scoop caps (infant formula)
- C** Handling of pouches (pharma)
- D** Depalletizing of glass jars (food)
- E** Handling of alu trays (food)
- F** Depalletizing of cans (infant formula)
- G** Palletizing of cartons (infant formula)
- H** Pattern forming of bags (food)
